

THE ART-JOURNAL

ILLUSTRATED CATALOGUE OF THE GREAT EXHIBITION OF 1851.

This interesting and valuable volume is now ready for delivery at the price of One Guinea, elegantly bound. It contains of 400 pages, and contains engravings of nearly 1,000 works of art and architecture, together with a table of contents, a history of the Exhibition (illustrated by large etchings and interior views), and essays by several learned professors on the leading objects of the Exhibition.

Early application for this volume is advisable, as it cannot be reprinted, and there is no doubt of its largely increasing in value.

The volume will be supplied by any bookseller in town or country.

Publisher: GEORGE VIRTUE, 23, Paternoster-row.

Complete, price 3s. or in Four Parts, price 6d. each.

HOW TO SEE THE EXHIBITION.

By W. BLANCHARD JERROLD.

"We have not met with a more intelligent, well-arranged, or agreeable guide to the Exhibition than is contained in this important little volume. A thorough mastery of the whole subject is displayed; the details are taken to the course least confusing or wearisome to the reader, and occasional remarks of the writer's own are in the best taste."—*Examiner*.

BRADBURY and EVANS, 11, Bowdoin-street; and all Booksellers.

Now ready, complete in 3 vols., cloth, price 3s. each; or in 10 parts, price 6d. each.

VOL. II. HUNT'S HANDBOOK to

the EXHIBITION OFFICIAL CATALOGUE: an Ex-

planatory Guide to the Natural Productions and Manufactures of

the Great Exhibition of the Industry of all Nations, 1851. Edited by

ROBERT HUNT, Keeper of Mining Museums. This work is so

arranged that every reader will be enabled at once to find the arti-

cles described, and to obtain a correct account of its characteristics.

"The amount of scientific knowledge here compressed into two

small volumes is astonishing; and this knowledge is not of an en-

cyclopaedia character, such as might be easily compiled from

books, but fresh and recent on all subjects, more especially in the

departments of science. The most instructive guide to the Exhi-

bition while it is open—we have no doubt that this Handbook will

become hereafter one of the most popular manuals and histories of

the great gathering of the nations."—*Illustrated London Review*.

"Careful in the Exhibition, and serviceable afterwards as a re-

minder of what was seen in the great year of 1851."—*Standard*.

SPICER, BROTHERS, Wholesale Stationers

WM. CLAVES and SON, Printers.

25, New Bridge street, Blackfriars; at Hyde-park; at all Booksellers

in Town and Country; and at the Railway Stations.

Now Ready.

LARDNER'S HANDBOOK OF NATURAL

PHILOSOPHY and ASTRONOMY. First Course—Mechanics,

Hydraulics, Pneumatics, Sound, and Optics. One vol. large

12mo. 400 pages, 6s. Woodcut. 12s. 6d. cloth.

II.

LIEBIG'S CHEMICAL LETTERS. Cheap

Edition, greatly enlarged, containing a Sketch of the History of

Chemistry, and the Author's latest views on Dietetics, Physiology,

Agriculture, &c. Complete, one vol., fcp. 8vo. 35s. paper, 4s. cloth.

III.

WALSHE'S (Dr. W. H.) NEW WORK on

DYSPEPSIS OF THE HEART and LUNGS; their symptoms and

Treatment. One vol. 12s. 6d.

A MOST SPLENDID WORK ON RICHLY PAINTED AND STAINED GLASS WINDOWS. DIVERS WORKS OF EARLY MASTERS

Christian Decoration.

WITH AN INTRODUCTION CONTAINING

THE BIOGRAPHY AND CONTEMPORANEOUS ASSOCIATIONS IN ART OF ALBERT DURER.

ILLUSTRATED BY

SEVENTY-FIVE SPLENDID ENGRAVINGS BY LE KEUX AND OTHERS,

Many beautifully illuminated and coloured under the superintendence of

MR. OWEN JONES,

Representing the celebrated Painted and Stained Glass at Gouda, in Holland, the Painted Ceilings and Decorations of the Church of St. Jacques, at Liege; with some English Examples of Painted and Stained Glass of an earlier date, &c.

EDITED BY JOHN WEALE.

Two magnificent Vols. Imperial folio. Published at 10s. 10s.; reduced to 5s. 10s. Elegantly half-bound morocco, gilt leaves.

"The many favourable notices of this splendid book would fill a volume; the following are a few extracts—

"This work is one of those rare productions of art which at once excite admiration and defy criticism. It is not only the most splendid work of the kind that has yet been attempted in England, but it is, we believe, perfectly unique, and opens a new province in the region of decorative art to the student and amateur. The windows at Gouda are unanimously allowed, by the best judges and ablest connoisseurs, to be the perfection of that mode of painting, and of unsurpassable beauty in regard to execution and colouring."—*The Times*.

"This is, in every sense of the word, a splendid book. That part

of the volume devoted to an account of Albert Durer and his works is particularly interesting, and is the fullest and best notice of him yet given. Many magnificent specimens of painted glass are given, the plates measuring twenty inches in height, and richly coloured in imitation of the original. Certainly more splendid examples of glass-painting could not be found. To conclude—the book is in every way worthy of patronage, and adds another to the long list of princely works produced by private spirit in this country."—*Art-Journal*.

AN INQUIRY INTO THE HISTORY OF

Ancient Glass Painting,

ESPECIALLY IN ENGLAND;

WITH PRACTICAL HINTS ON GLASS PAINTING;

Also Observations on the Present State of the Art; Suggestions for its Application to Particular Purposes, and as to the best Means for its Advancement, &c.

BY AN AMATEUR.

ILLUSTRATED BY SEVENTY-FIVE PLATES.

2 Vols. 8vo. Reduced to 18s.—Published at 17. 10s. In extra gilt cloth.

"A succinct description utterly fails in conveying any adequate notion of the elaborate research that must have been required for the compilation of these volumes, of the value of the suggestions that they embody, or of the archaeological knowledge which the author has brought to bear on the subject of his acquisition. None of the plates are in outline, but many are coloured, with a carefulness of touch and brilliancy of effect altogether unusual, and all are as accurate as to be available, if necessary, for working models, from having been drawn to scale."—*Morning Post*.

"The present work supplies a great deficiency, and treats of the subject in such a way as is likely to be useful and interesting to one to the antiquary, the amateur, and the practical artist. The plates have been evidently most carefully selected, with a view to show the progress of the art from the thirteenth to the seventeenth century, and in execution and getting up are inferior to none which have hitherto appeared."—*Guardian*.

G. WILLIS, GREAT PIAZZA, COVENT GARDEN.

THE ARCHITECTURAL QUARTERLY

REVIEW.—Advertisements for the October Number should be sent before the 3rd instant. Contents of last Number, notices of the Press, and prospectus may be had at the Publisher's.

GEORGE BELL, 108, Fleet-street near St. Dunstan's Church.

Reduction of price.

HAND-RAILING—THE ORTHO-

DOXAL SYSTEM OF HAND-RAILING, with practical

illustrations of the Construction of Railings.

The above system, the subject of a prize medal of the Society of Arts, forms the most complete treatise of hand-railing published.

Price, 10s. 6d. or, if sent by post, 11s. 6d.

SIMPSON, MARKHAM, and CO., or, by order, of any Bookseller.

STAINING DEAL TO IMITATE ALL

KINDS OF WOODS. It requires no staining, and will stand

the exposure to the weather. Price 4s. per gallon. Varnishes for

W. W. M. M. may be had at the Factory, 5, James-street,

Oxford-street.

STEPHENS'S ORIGINAL DYES, for

STAINING COMMON DEAL TO IMITATE OAK, MAHAGANY,

or SATINWOOD colour. For specimens of the effects of these

dyes, the public are referred to the WOODWORK of the GREAT

EXHIBITION, and particularly the ENTRANCE PORCH,

which were coloured with the stains invented and manufactured

by HENRY STEPHENS, of 34, Stamford-street, Blackfriars-road,

who supplied to the workmen 34 stain and varnish, and who

was the first person to introduce and call the attention of the public

to this means of colouring wood, so as to bring forth the orna-

mental effect of the natural grain, and thus save the expense of

artificial imitation.—Preserved and sold by HENRY STEPHENS,

34, Stamford-street, Blackfriars-road.

THE METALLIC PAINT, produced by

the PATENT ALKALI COMPANY, has been extensively

used for several years on farm buildings, iron bridges, roofs,

and railings, shipping, &c. and is universally admitted that it covers

a greater surface than any other pigment, and stands far better on

wood, iron, Alabaster, lime, and Roman cement, than the ordinary

paints. Fine black, 5s. per ton; rich purple brown, 10s. per ton.

Company's Office, 1, New Broad-street, London.

JOHN A. WERT, Secretary.

EVANS'S MINERAL OXIDE PAINTS.

Office, 8, Philpot-lane, London.

Green Oxide of Iron, 5s. per Cwt.

Lead Oxide, 5s. " "

Blue Oxide of Iron, 5s. " "

Black Oxide of Iron, 5s. " "

Dark Brown Oxide of Iron, 5s. " "

Yellow Oxide of Iron, 5s. " "

These preparations of the Mineral Oxide Paints will be found

more durable, and at the same time more economical than any

other paint.

They are proof against atmospheric action, acids, and salt water,

of which the following testimonials are sufficient evidence.

"I, William Evans, do hereby certify that the Mineral Oxide Paints

of the Evans's Mineral Oxide Paints Co. have been used by me for the

purpose of painting the exterior of the Trinity House, both as to

the quantity and the durability of the Paints, and the economy of cost.

"You are at liberty to make use of this testimonial in your

favour." "We are, Gentlemen, your obedient servants.

(Signed) "BROWN, LENNON, and CO."

"4, Wharf-Chand-road, Kingsland-road."

"We have used your paint on the various gas works which

we have constructed during the last seven years and have no hesi-

tation in stating it to be the best and most durable covering for

iron."

"We shall continue to use and recommend it as heretofore."

"We are, Sir, yours obediently."

"WERTWOOD and WRIGHTS."

Other testimonials can be had on application.

CLASS II.—CHEMICAL and PHARMACEUTICAL

PRODUCTS.

DAMP WALLS.—NEW ELASTIC

PAINT, an effectual remedy inside or out; will dry in a

few hours, and may be immediately papered over if desired.

PATENT MINERAL ZINC PAINT, invaluable for cheap-

ness, durability, and permanence. READY FOR USE; will stand any

climate, and is well calculated for exportation. White, stone,

and lead, 2s. 6d. per gallon; green and blue, 3s. per gallon.

PATENT LIQUID CEMENT, READY FOR USE on the

fronts of houses, only one-sixth the cost of oil paint; for beauty

presentment giving the appearance of fine-cut stone. In casks of

1 cwt., 3 cwt., and 5 cwt., at 1s., 12s., and 15s. each. Casks return-

able.

G. BELL and Co., Steam Mills, 2, Wellington-street, Goswell-

street, London.

PURE WHITE ZINC PAINT.—Manu-

factured from the Vieille Montagne Company's white oxide

of zinc; perfectly free from all poisonous qualities, is unaffected

by sea water, sulphuretted hydrogen, or any of the gases, and

preserves its original colour where white-lead paint will not.

Also the Zinc Paint, strongly recommended for iron work, sold

wholesale by JOHN WANNER and SONS, 6, Cru-cant, Jewin-

street, London.

PURE PATENT WHITE ZINC PAINT.

From the Vieille Montagne Zinc Mining Company.—This

Company having become Proprietors of all rights and patents of the

late Patent White Zinc Company in France and Belgium, is pre-

pared to furnish, on a large scale, the WHITE OXIDE OF ZINC

in a pure state, and of a quality which can only be manufactured

with the zinc from the mines in Belgium. Patent White Zinc

Paint is superior, in every respect, to white lead paint. It is

entirely free from all poisonous influences, and is unaffected by sea-

water, sulphuretted hydrogen, or any gas; besides, it preserves

its original colour, which White Lead Paint does not. White

Zinc Paint causes none of those ravages, invariably perpetrated by

white lead, upon the human frame; neither painters' colic nor

dermatitis, &c. &c., to which dangerous complaints the workmen,

who manufacture and use it, are subject, and to which persons

who inhabit newly-painted apartments are also liable. A superior

article having been introduced in the market, under the name of

White Zinc Paint, the public is cautioned against it, because,

when adulterated, it becomes a very inferior paint, instead of a

first-rate one.—For further particulars and prospectus, apply to

Mr. H. F. CHMOLL, General Agent for England and Scotland,

at the Company's Office, 15, Manchester Buildings, Westminster

bridge; and for supply of material and prices, at Messrs. CHAS.

DEVAUX and CO., 62, King William-street, City.

HUBBUCK'S PATENT WHITE ZINC

PAINT.—This elegant white, the favourite pigment of the

ancients, has been used by artists through successive generations,

and is still known to the members of the Royal Academy under

the old name of Permanent White.

Three years since the proprietors placed their manufacture on a

large scale, and offered it at a price to compete with White Lead.

The successful introduction of this paint, and its confessed su-
